BACTERIOLOGICAL EXAMINATION

S.No.	CHARACTERISTICS	RESULTS	IS:10500-2012 LIMITS	TEST METHOD
1.	Total Coliform bacteria per 100 ml	absent	absent	IS:1622-1981(RA 1996)
2.	E.coli or thermotolerant coliform bacteria/100 ml	absent	absent	IS:1622-1981(RA 1996)

The Physico-Chemical & Bacteriological test characteristics for the water sample were evaluated & examined in accordance with the Indian Standard Specification for Drinking Water IS:10500-2012, IS: 3025-1964 & IS:1622-1981(RA 1996).

It is recommended that the 'acceptable' limit is to be implemented. Values in excess of those mentioned under 'acceptable' render the water not suitable, but still may be tolerated in the absence of alternative source but up to the limits indicated under 'permissible limit in the absence of alternate source', above which the source will have to be rejected.

The water sample meets the requirements as per IS:10500-2012 Specification with respect to the above parameters tested. The results for the physico-chemical & bacteriological examination confirm to the specific limits prescribed for the drinking water.

The Water is suitable for drinking purpose.
